

Restorative IV Therapies, PLLC

Some of the IV Therapies we offer at Integrative Functional Medicine:

Myers Cocktail: Filled with vitamin C, magnesium, calcium, selenium and B vitamins, The Myers cocktail provides many nutritional benefits and helps bring balance to the body. It is designed to boost the immune system, reduce symptoms from seasonal allergies, sinus and respiratory tract infections, relief from migraines, fatigue, and helps alleviate stress.

Wellness Infusion: This infusion is a great way to restore balance and rejuvenate the body. It contains vitamins and minerals with a mega boost of vitamin C and glutathione.

Super immunity with Vitamin C: Boost your immunity with a mega-dose of vitamin C, plus B vitamins, minerals, and antioxidants. This is great for flu, immune support, sinus and respiratory infections, chronic infections, and many other chronic diseases.

Phosphatidylcholine: A type of phospholipid found in all cell membranes within the body. Used to support cardiovascular, mental, and hepatic health, Parkinson's disease, memory loss, and treatment for mold and fungal overgrowth. Price dependent on dose.

IV Pushes: An IV Push rapidly delivers nutrients through a syringe in a much shorter period of time. We offer:

- **Glutathione:** A very powerful antioxidant referred to as the “mother of antioxidants”, is anti-aging and required for the detoxification of toxins from the body and maintenance of cellular health. Low glutathione levels are associated with high oxidative stress, which is linked to aging and many illnesses. Benefits include improved mental clarity and focus, strengthens the immune system, treats acute reactions to chemicals and heavy metals, improves athletic performance, detoxifies the liver, and slows down the aging process. Price dependent on dose.
- **Immune Boost:** Jumpstart the immune system and aid in recovery from common acute infections with a boost Vitamin C, B vitamins, minerals, and antioxidants.
- **Therapeutic Vitamin C:** In low doses, vitamin C (or Ascorbic Acid) is a potent antioxidant that has the power to boost immune function, increase resistance to infection, and protects against a wide range of diseases. Given in high doses Vitamin C has an anti-inflammatory and anti-tumor effect that has shown to be an effective adjunct therapy for cancer. High dose infusions require a consult and specific lab test prior to the first infusion. Packages available based on dosing.

(Price dependent on dose; 25gm, 50gm, 75gm, 100gm)
